Pre-Surgical Bloodwork and Consent Form

Owner's Name: _____ Pet's Name: _____

Daytime Phone Number: _____ Proposed Surgical Procedure: _____ Initial: _____

Date Of Procedure: _____

Your pet is in for anesthesia/surgery and should recover normally. However, we highly recommend that we perform bloodwork to help rule out pre-existing internal problems (such as anemia, clotting disorders, infection, diabetes, and/or liver & kidney problems) that may not be evident physically and could lead to complications. *I have an understanding of the possible risks involved with the procedure. I also understand and realize results cannot be guaranteed.*

The cost for this bloodwork is \$74.50. If your pet is 7 years or older, we require bloodwork to be done in order for us to perform the procedure on your pet. Only a Doctor can override these safety measures.

YES, Please complete the pre-surgical blood screen you recommend.

NO, I have decided to decline the recommended pre-surgical blood screen.

IV Fluid Therapy:

We highly recommend IV fluid therapy for all pets to help maintain blood pressure and prevent dehydration during anesthesia. If you consent to this added benefit, **the cost is \$38.00**. Please indicate your authorization. (Many doctor's estimates already include this service.) **If your pet is 7 years or older, we require fluids to be done in order for us to perform the procedure on your pet. Only a Doctor can override these safety measures.**

YES **NO**

FOR DENTAL WORK The doctors would like your approval to extract teeth that are loose, infected, or that may cause problems later on. Please indicate whether you authorize possible extractions and pain medication.

YES **NO**
